pulsefitness

THE CONNECTED OPERATIONS PLATFORM

# Your equipment, faults and history — in one clear portal.

Log faults, track equipment, request parts and see your whole estate at a glance — purpose-built for fitness facilities.

**pulsefitness.ai** Built by fitness equipment and service specialists

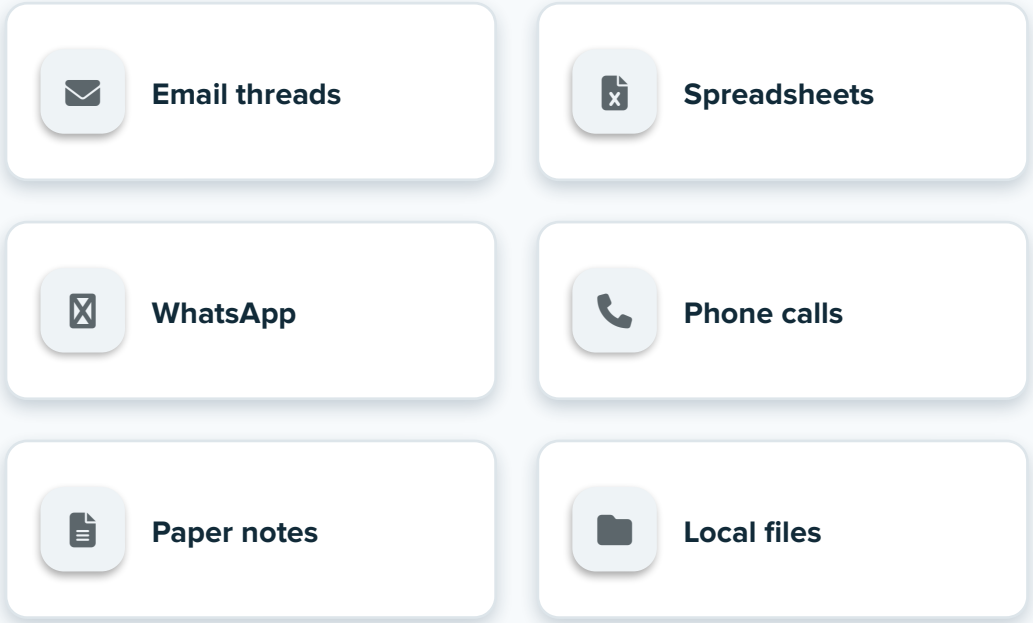

THE CHALLENGE

# Too much runs through disconnected tools

Equipment, faults and history end up spread across inboxes, spreadsheets and messages — so nothing is truly visible.

When information lives in separate places, jobs get missed, response slips, and it's hard to prove what happened to a machine and when.

- **No single record** history scattered across people and systems
- **Slow fault handling** logged by phone or message, easily lost
- **Weak reporting** downtime and repeat faults hard to evidence
- **No audit trail** limited visibility for managers and owners

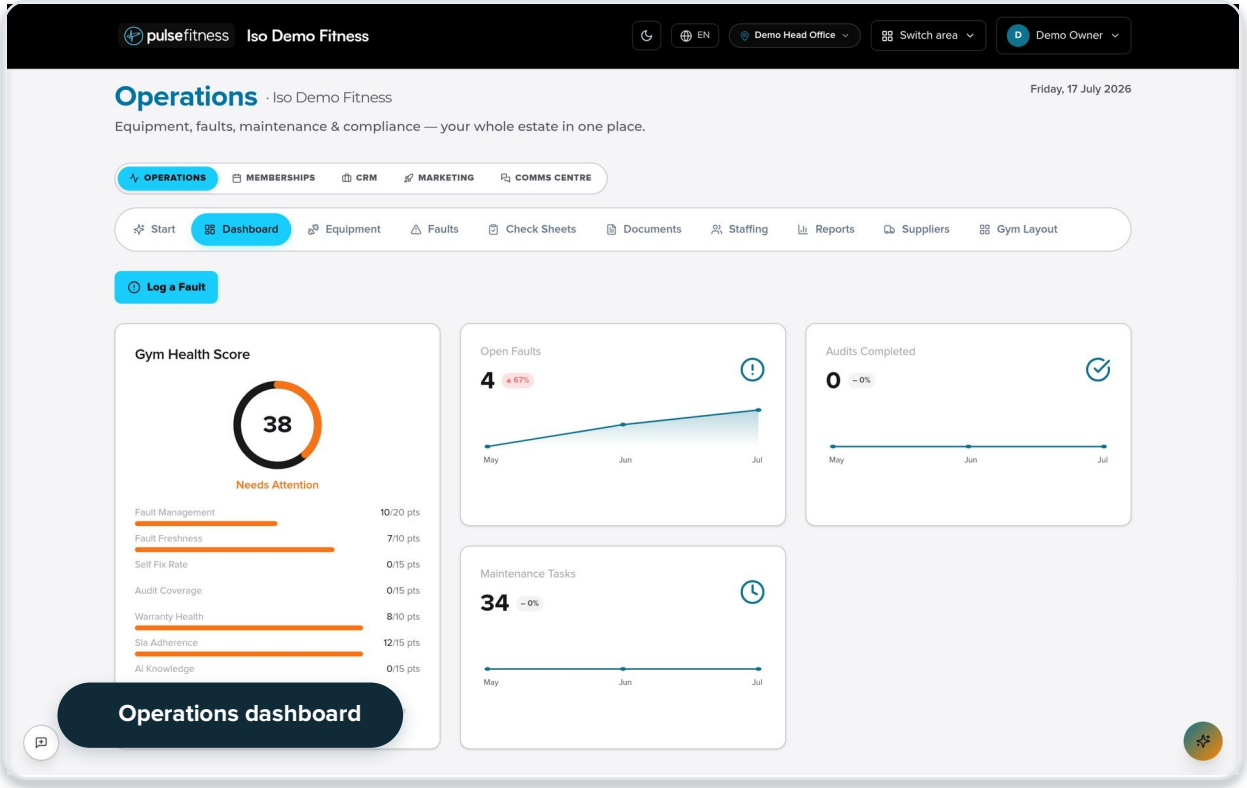

THE PLATFORM

# One connected portal for your facility

Pulsefitness.ai brings equipment, faults, parts, compliance and reporting into a single place your team actually uses.

- **A live health score** see how your estate is performing at a glance
- **Everything linked** faults and parts sit against the right machine
- **One or many sites** switch between locations in a click
- **Full history** every action recorded and easy to retrieve

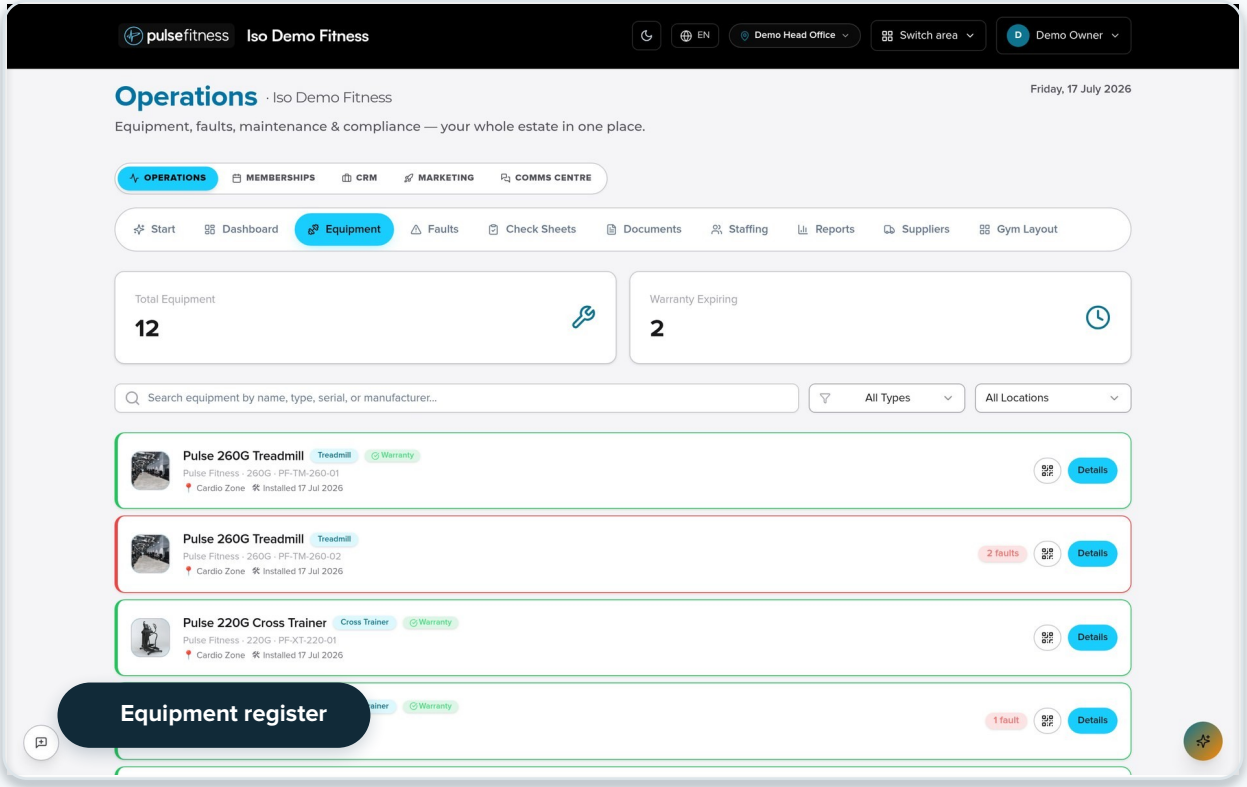

ASSET MANAGEMENT

# Every machine has a complete record

A reliable source of truth for each item of Pulse Fitness equipment across all of your sites.

- **Make, model & serial** each machine identified precisely
- **Warranty at a glance** cover status shown on every item
- **Photos & location** know exactly what it is and where
- **Service history** faults, visits and parts on the record

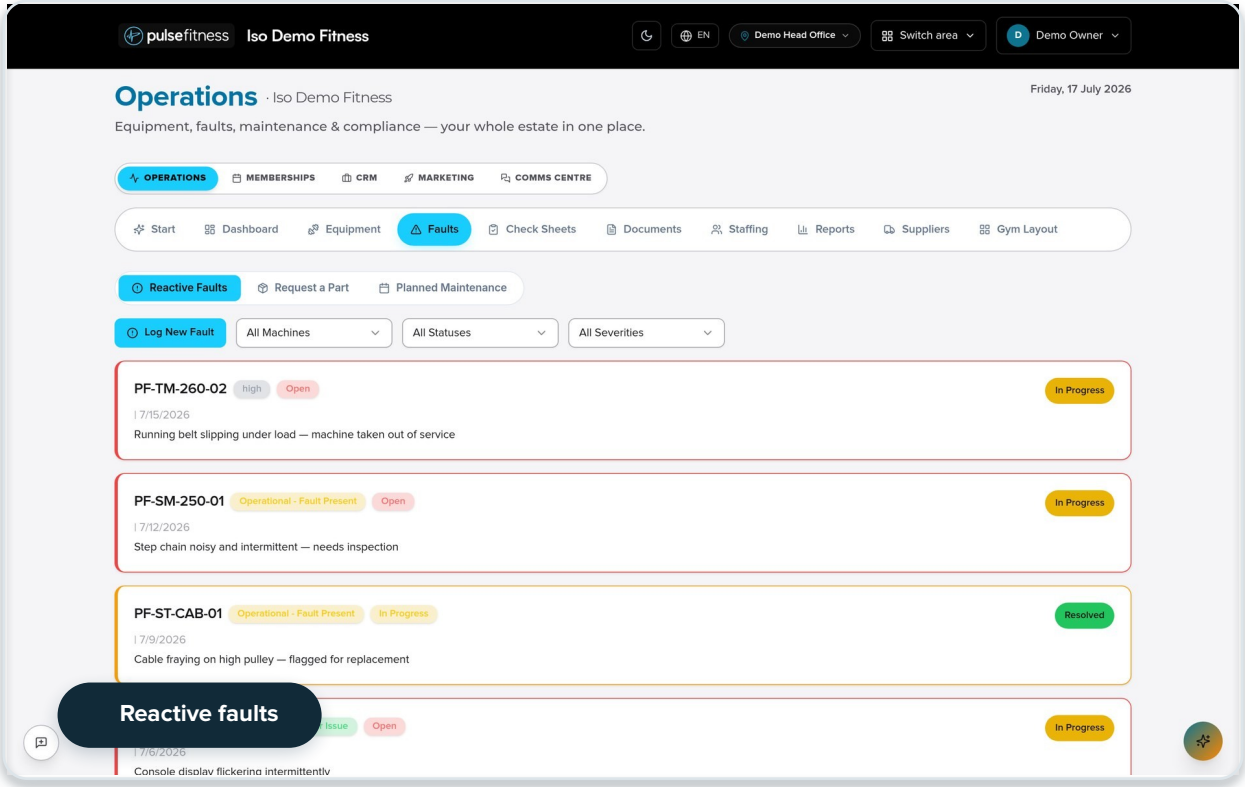

FAULT LOGGING

# Report faults against the right machine

Structured fault capture means issues are clear, tracked and never lost in a message thread.

- **Linked to equipment** every fault against the correct asset
- **Priority & status** flag out-of-service machines and urgency
- **Photos & notes** evidence so the fix arrives prepared
- **Tracked to resolution** a clear trail from reported to resolved

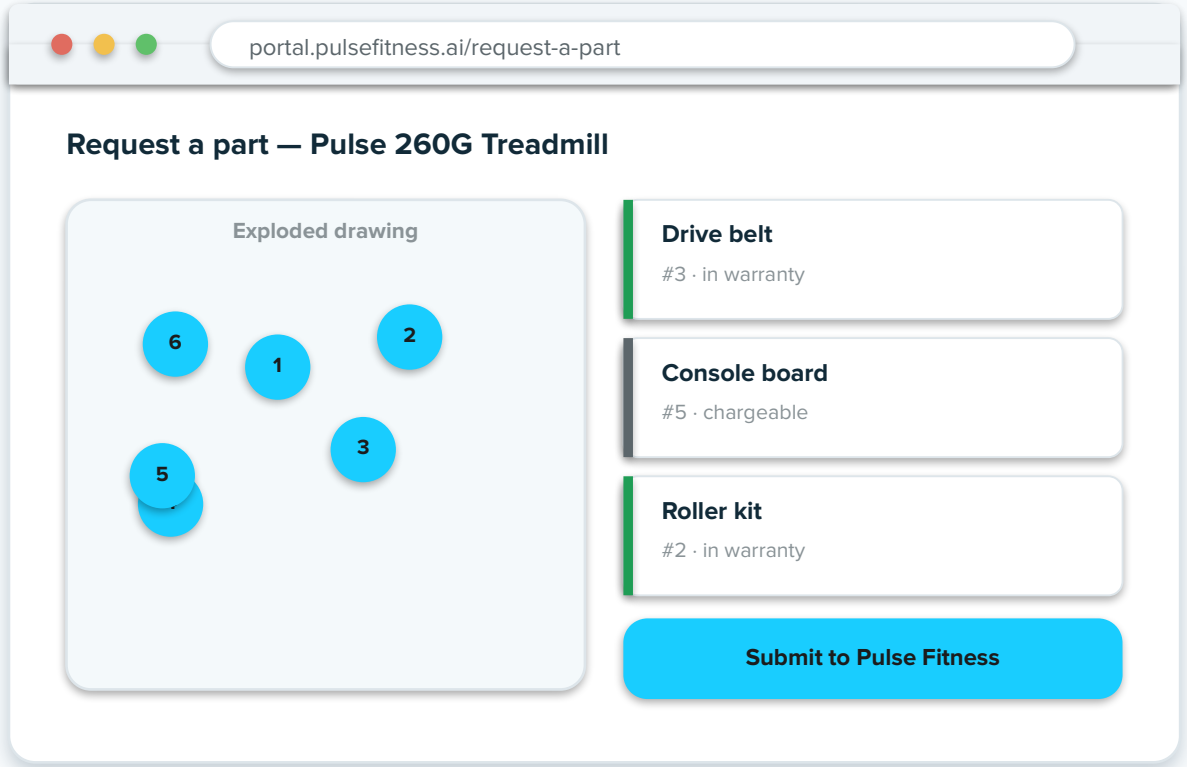

REQUEST PARTS

# Order the right part, first time

Part requests are tied to the exact machine, with drawings and photos to remove the guesswork.

- **Against the machine** requests tied to the exact asset & serial
- **Exploded drawings** pick the correct part from a diagram
- **Warranty visibility** see cover before you request
- **Straight to Pulse** submitted directly to our team

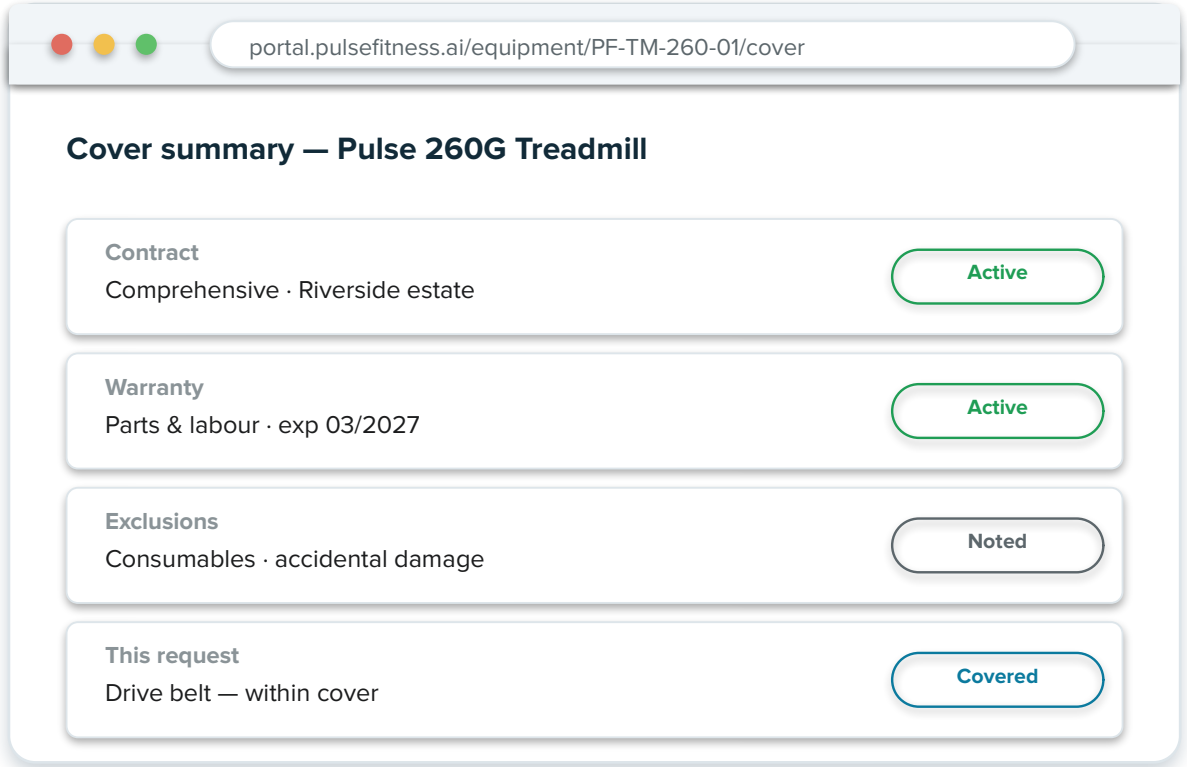

CONTRACTS & WARRANTY

# Know what's covered before work begins

Warranty, contract cover, exclusions and chargeable status — all visible against the equipment.

- **Warranty** active cover and expiry dates at a glance
- **Contract cover** the agreement in place for each site
- **Exclusions** what falls outside cover, clearly shown
- **Chargeable decisions** confident, evidenced calls on billing

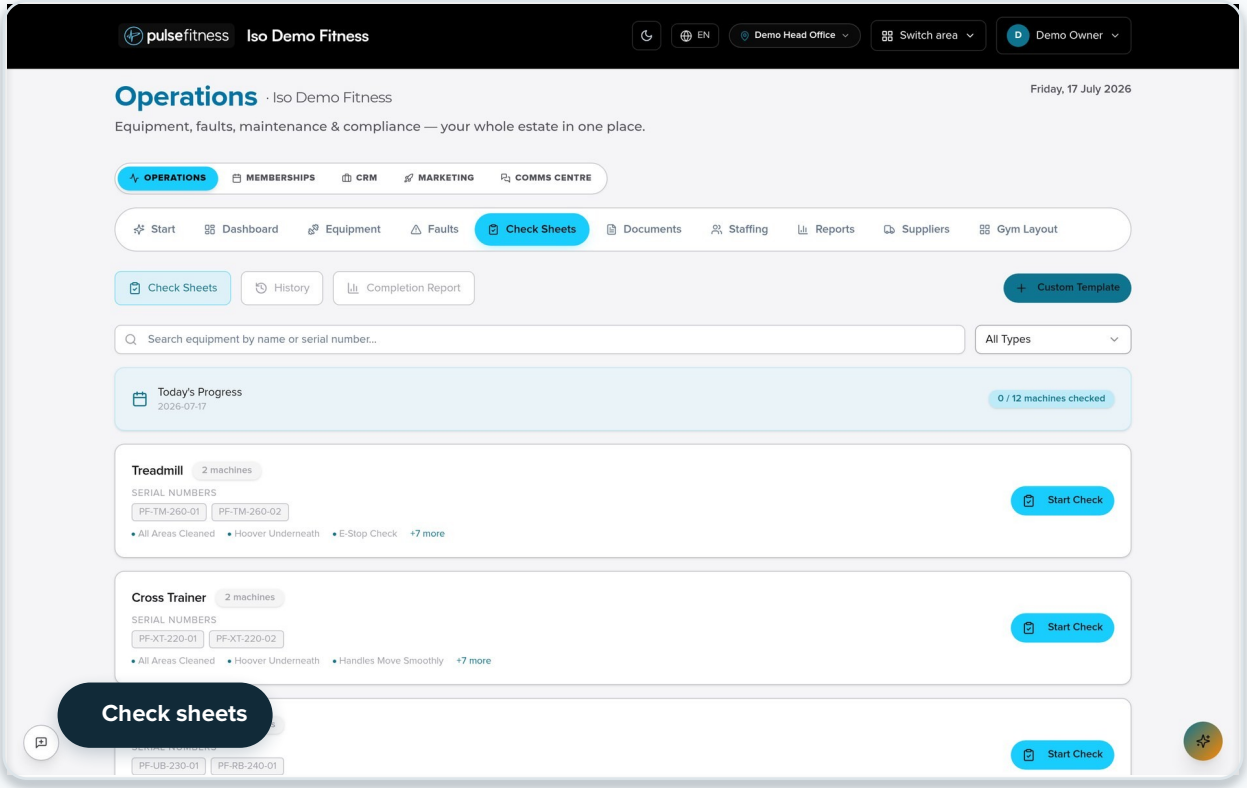

SAFETY & COMPLIANCE

# Routine checks and records, done properly

Daily check sheets, risk assessments and incident records — with a complete, time-stamped trail.

- **Daily check sheets** per-machine safety checks, quick to complete
- **Accident & RIDDOR** incident records captured and stored
- **Risk assessments** documented against sites and tasks
- **Audit trail** every entry logged and easy to evidence

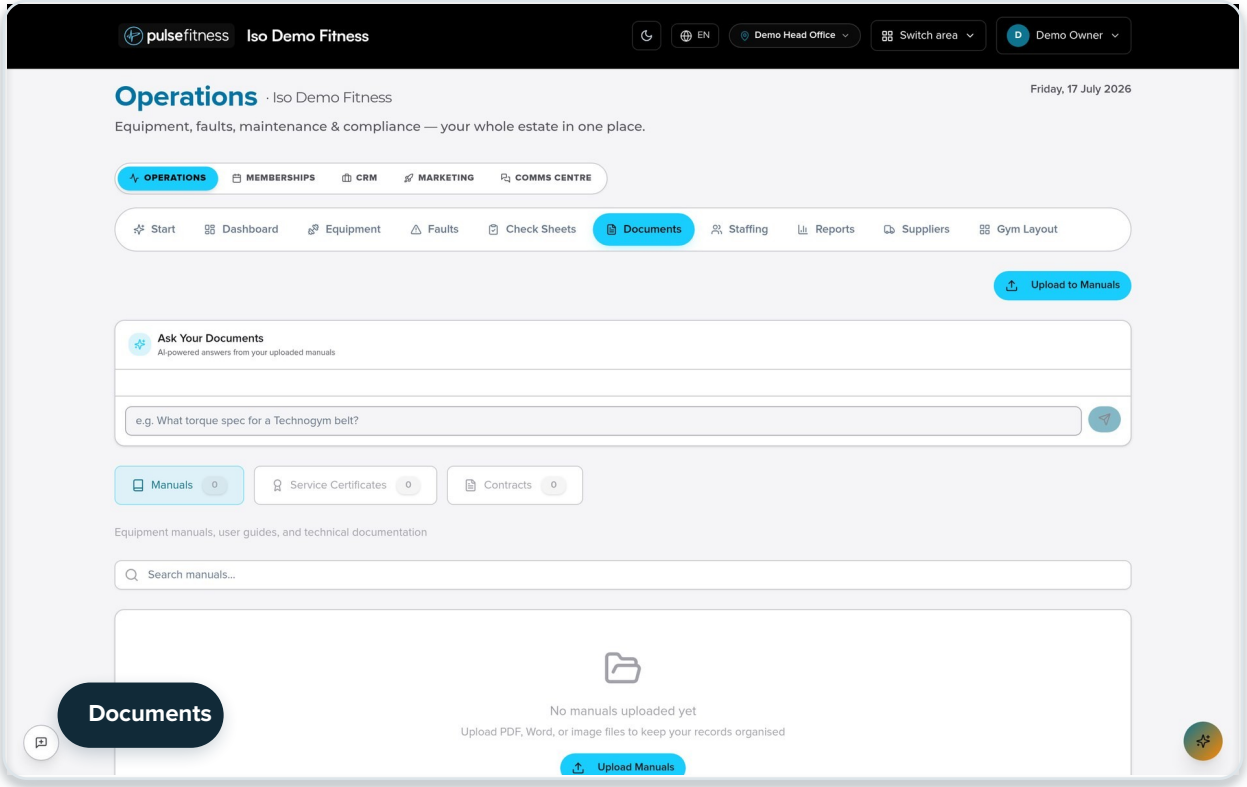

DOCUMENTS & MANUALS

# Every manual, certificate and contract in reach

Keep equipment documentation together — and ask questions of it in plain English.

- **Manuals & guides** technical docs stored against the estate
- **Certificates & contracts** organised and quick to find
- **Ask your documents** get answers from your manuals instantly
- **Always to hand** the right document at the machine

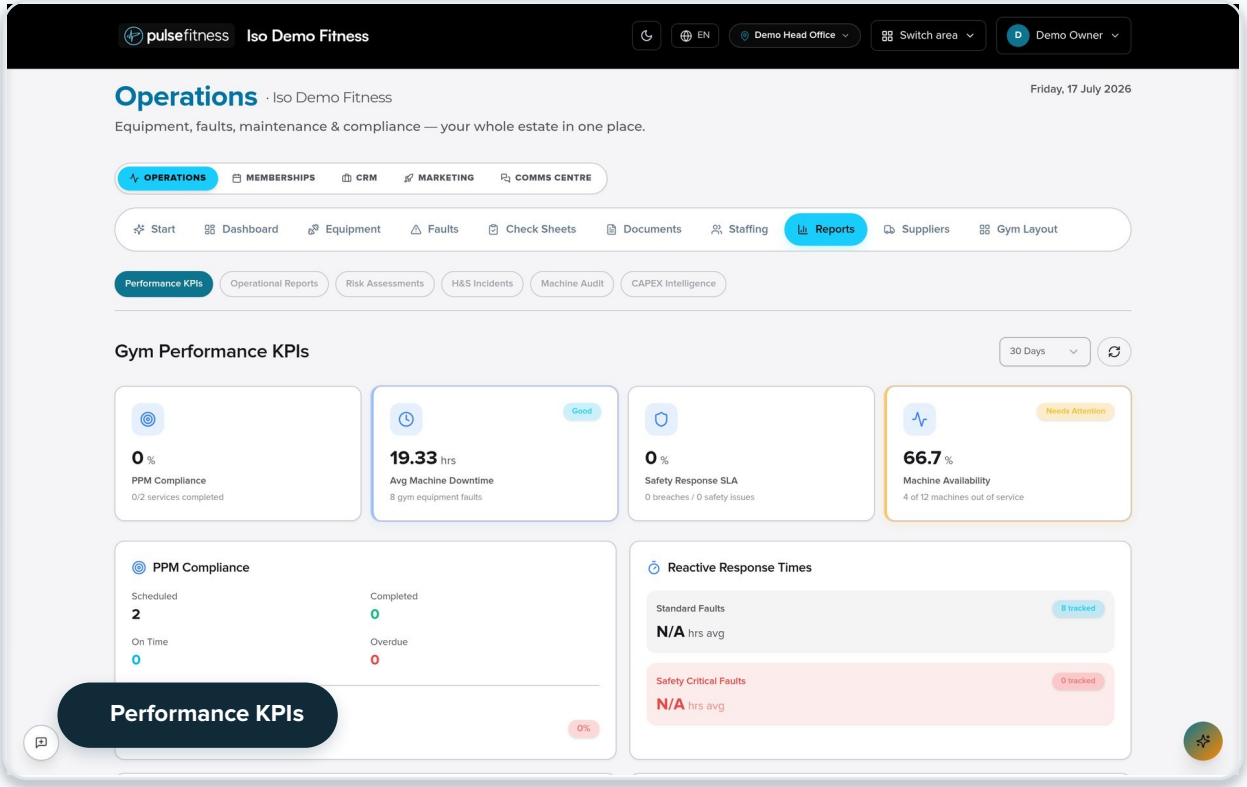

REPORTS & DASHBOARDS

# The numbers that run your operation

Clear reporting across faults, response times, downtime, availability and safety performance.

- **Availability & downtime** see equipment uptime across the estate
- **Response times** how quickly faults are actioned
- **Repeat issues** surface the machines that keep breaking
- **Safety performance** SLA and incident visibility

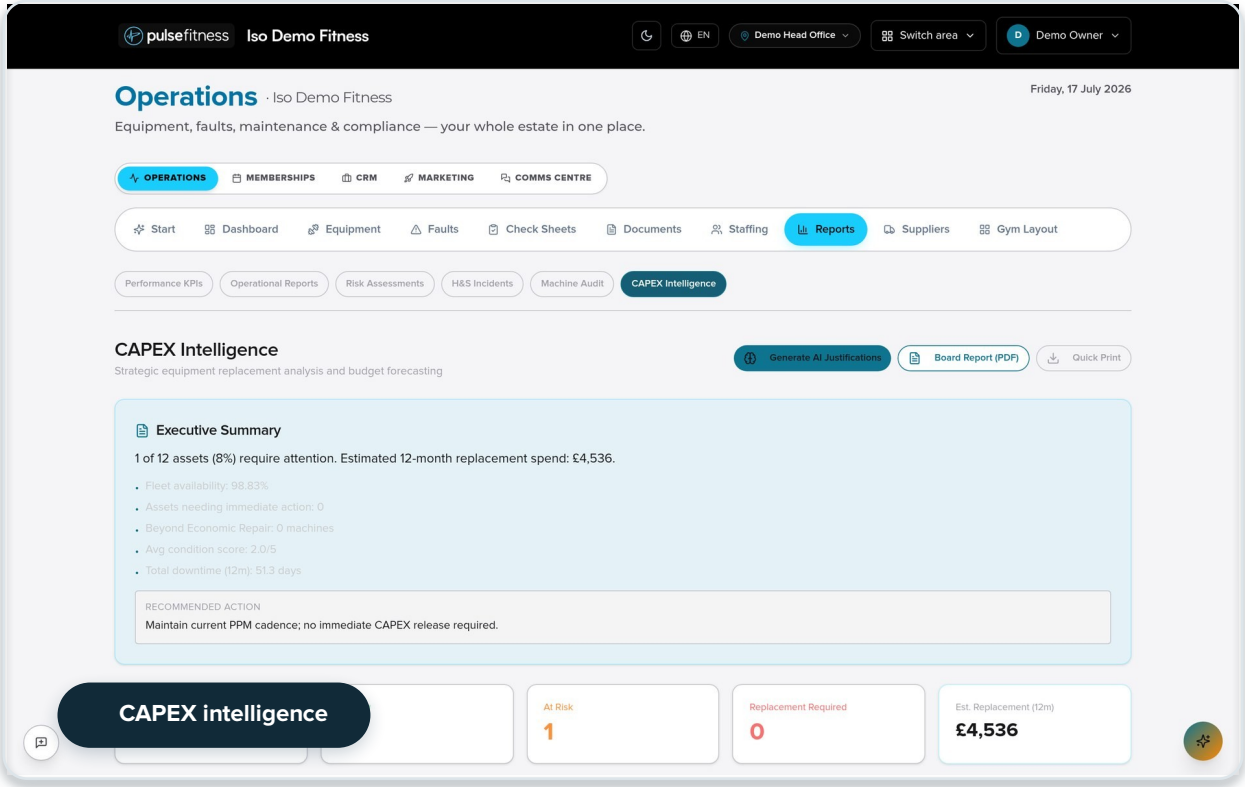

CAPEX REPORTING

# Build the evidence for replacement

Turn service history into a clear, defensible case for repairing or replacing ageing equipment.

- **Age & condition** identify equipment nearing end of life
- **Faults & downtime** quantify unreliability and its impact
- **Replacement spend** forecast the year ahead with confidence
- **Board-ready report** a clear case for capital investment

ONBOARDING

# Add your equipment quickly — two ways

Import by spreadsheet, or photograph a machine and let Pulse draft the record for your review.

01

## Upload

Add equipment by spreadsheet, or photograph the machine and data plate.

02

## Extract

Pulse reads make, model and serial and drafts the asset record.

03

## Review & confirm

Your team checks the detail and approves it into the register.

**Nothing is added automatically.** AI drafts the record; your team always reviews and confirms first.

AI SUPPORT

# Practical help, with people in control

AI assists your team with the routine — from reading manuals to building replacement cases — but never decides on its own.

### Ask your documents

Plain-English answers pulled from your manuals.

### Fault triage

Likely causes and next steps suggested for a fault.

### CAPEX evidence

Assembles the case for repair or replacement.

### Onboarding checks

Reads data plates and pre-fills records for review.

### Summaries

Condenses long histories into a clear picture.

### Report drafting

Helps produce clear, consistent reports.

WHY PULSEFITNESS.AI

# Built for real operational problems

Not another disconnected tool — a platform shaped by people who service fitness equipment for a living.

### One connected platform

Equipment, faults, parts, compliance and reporting in one joined-up system.

### Built by specialists

Designed by fitness equipment and service experts who know the work.

### Designed for the day-to-day

Focused on the practical problems facilities face, every single day.

WHO IT'S FOR

# Built for the whole sector

From a single independent gym to national multi-site operators.

- Commercial gyms
- Multi-site operators
- Leisure trusts
- Councils
- Universities
- Hotels
- Studios
- Colleges
