THE PROBLEM

Fitness businesses run on disconnected systems.

Most gyms and studios still stitch their operation together from tools that were never meant to talk to each other.

- Spreadsheets
- WhatsApp
- Email threads
- Booking app
- Disconnected CRM
- Paper records

When systems don't talk to each other, the business pays for it.

Information gets lost · admin piles up · members are let down · and managers lose visibility across sites.

THE SOLUTION

GymAxisAI brings everything together.

One intelligent platform connecting the key parts of your fitness business — a single source of truth for the whole operation.

Marketing

AI campaigns powered by your real member & lead data.
