THE PROBLEM

Service teams run on paper and WhatsApp.

Engineers and service providers lose hours to manual admin — and the office loses visibility of every job.

- **Paper job sheets**
- **WhatsApp dispatch**
- **Lost service history**
- **Missing van stock**
- **Manual invoicing**
- **No job visibility**

Disconnected jobs cost time, parts and trust.

Reports go missing · history disappears · parts aren't tracked · invoices are slow · and customers are left in the dark.

THE SOLUTION

One connected service workflow.

GymAxisAI links the Service Desk, the Engineer App, stock and contracts — so every job flows from logged to invoiced.

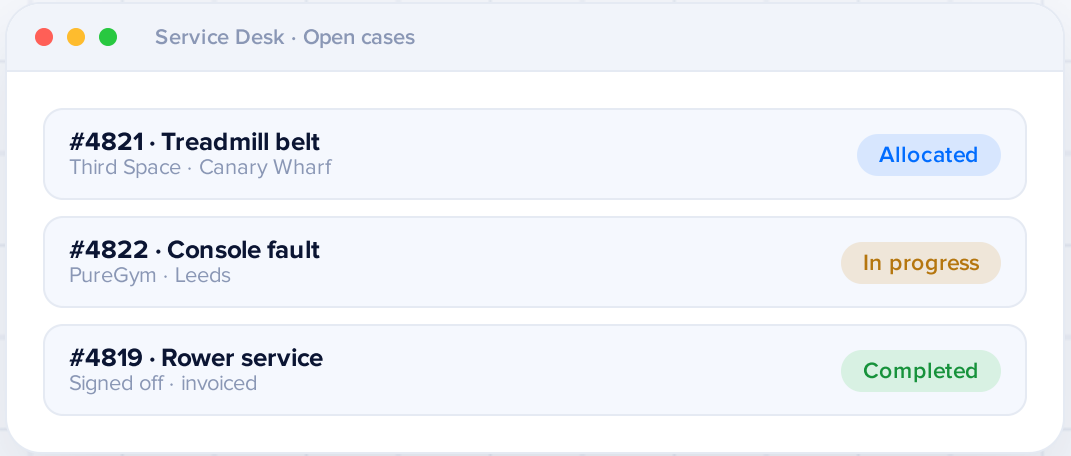

SERVICE DESK

Every job, from logged to completed.

- Case logging
- Engineer diary
- Customer communication
- Full job history
- Job allocation
- Service reports
- Quotes & invoices
- SLA & status tracking

KEY MESSAGE

The office gets the reports it needs — and customers get visibility at every step.

ENGINEER APP

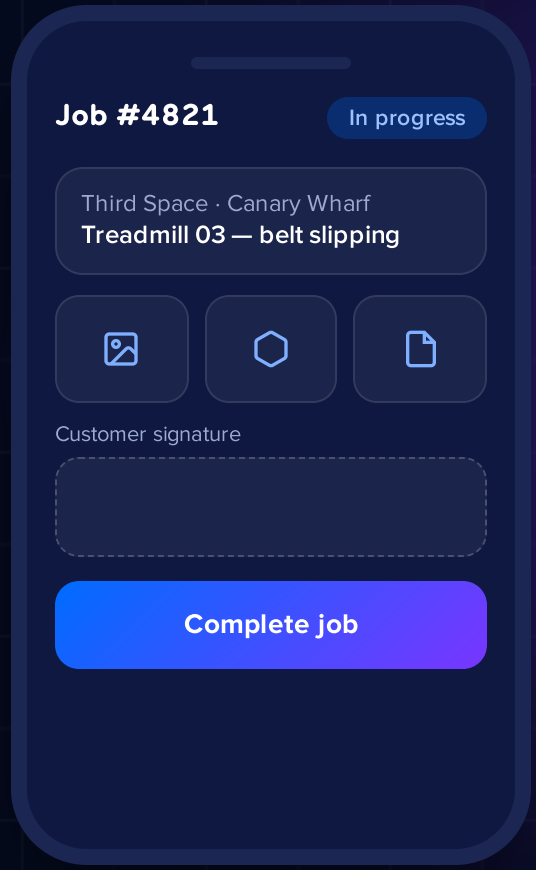

Everything the engineer needs, in their pocket.

A mobile-first app that turns every site visit into a complete, signed-off record.

- Mobile job view
- Customer signatures
- On-site quotes & invoices
- Photos & videos
- Parts used on the job
- Works offline, syncs later

KEY MESSAGE

Engineers complete jobs properly — no paper, no lost reports, no follow-up admin.

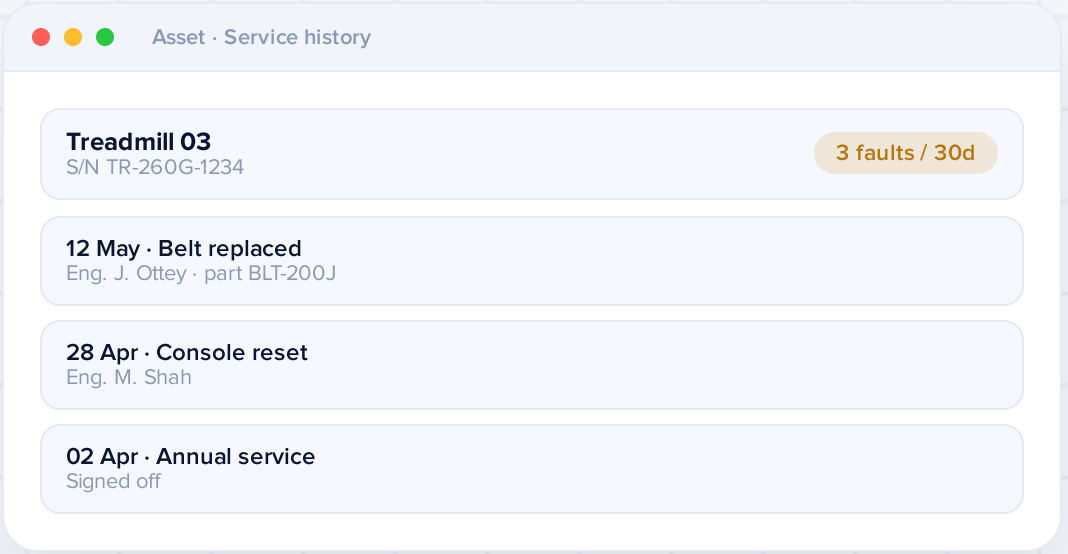

ASSET MANAGEMENT

Full service history, on every machine.

- Asset register & serials
- Fault logging
- Parts tagged to assets
- Condition notes
- Full service history
- Recurring fault tracking
- Risk indicators
- Asset-level reporting

KEY BENEFIT

Walk onto any site knowing exactly what's been done, when and by whom.

STOCK & PARTS CONTROL

Know what's on the van, used, and where.

- Van stock
- Import stock lists
- Tag parts to equipment
- Usage history & reports
- Parts catalogue
- Parts used on jobs
- Replenishment requests
- Low stock alerts

KEY BENEFIT

Less missing stock, better replenishment and full traceability.

CONTRACTS · CAPEX · COMPLIANCE

Cover, planning and compliance built in.

Service Contracts

- Cover levels
- Customer entitlement
- Renewal tracking

CAPEX Reporting

- Asset replacement planning
- Investment forecasting
- Risk-based prioritisation

Compliance

- Accident reports
- RIDDOR reports
- Full audit trail

KEY MESSAGE

Honour the right cover, plan replacements and keep professional, audit-ready records.

REPORTING & INSIGHTS

One view of your service operation.

GymAxisAI turns every completed job into data — so service managers and partners can see performance at a glance.

- Engineer activity
- Service performance
- Equipment faults
- Stock usage
- Contract renewals
- CAPEX risk
- SLA & response
- Invoicing

KEY MESSAGE

Turn disconnected data into useful decisions.

BUILT FOR

Solo engineers to national service teams.

Solo Engineers

- Jobs & reports
- On-site invoicing
- Less paperwork

Service Companies

- Service desk & diary
- Contracts & SLAs
- Team reporting

Multi-engineer Teams

- Allocation & routing
- Van stock per engineer
- Manager dashboards

OEMs & Suppliers

- Install & warranty
- Fleet service history
- Partner network

KEY MESSAGE

GymAxisAI scales with you — from a single engineer to a national service network.

WHY GYMAXISAI IS DIFFERENT

Not just another field service tool.
